Summary

Data Scientist and Engineer with a postgraduate degree in BI & Data Analytics, currently working as a Senior Market Data Analyst. Experienced in ETL, predictive modeling, EDA, DataViz (Power BI, Tableau), SQL on Oracle/TOTVS and MySQL databases, and process automation (Python, VBA). Developed Power BI dashboards with dynamic temporal filtering via SQL parameters and implemented end-to-end Machine Learning projects – from data collection and preprocessing to model deployment (locally and in the cloud – AWS). My analytical, communicative, and collaborative profile allows me to integrate engineering, statistics, and innovation to generate actionable strategies.

Skills

- **Data Engineering:** ETL/ELT, data pipelines, integration with Oracle/TOTVS databases
- **End-to-End Machine Learning:** EDA, preprocessing, hyperparameter tuning, metrics evaluation, and model deployment (Docker, FastAPI, AWS – Elastic Beanstalk)
- **Applied Statistics:** linear/logistic regression, hypothesis testing, and A/B tests
- **Python** (pandas, scikit-learn, statsmodels, matplotlib) and **SQL** (Oracle, MySQL)
- **Visualization & BI:** Power BI (dashboards with dynamic filtering), Tableau
- **Process Automation:** Python, VBA
- Team collaboration and cross-functional communication
- Strong analytical and data interpretation skills
- Self-motivation, holistic vision

Experience

Grupo OFS – Drogeria Moderna, Volta Redonda, RJ – *Market Data Analyst*

AGOSTO 2023 - PRESENT

- Developed transaction-level analyses (700K+ coupons/month) to detect anomalous pricing and review contractual terms, ensuring operational health and profitability.
- Implemented a market movement strategy that increased profitability by 11%.
- Integrated competitive data and operational conditions for dynamic pricing, using visualizations and statistics to optimize margin and competitiveness.
- Build dashboards that identify stock-outs and overstock, guiding new purchasing parameters.

- Structured a mass price-update process (over 400K changes per cycle), unifying multiple sources and standardizing alterations.
- Automated Excel routines (queries and VBA), reducing manual task time by 76%.
- Collaborated closely with senior management to define store clusters, adjusting policies to improve customer service and secure competitive margins.

City Government of Volta Redonda, Volta Redonda, RJ – *Minutes and Contracts Inspector*

FEBRUARY 2020 - SEPTEMBER 2023

- Created dashboards and reports in Power BI, supporting strategic decision-making in meetings with municipal leadership.
- Restructured administrative routines with a focus on efficiency, achieving productivity gains of over 137%.
- Implemented backup routines (physical and cloud-based), ensuring high data availability and security.
- Acted as a liaison between service departments and users, facilitating communication and resolving critical demands.

Education

Google Career Certificate (Coursera) – *Professional Course of Advanced Data Analytics*

JANUARY 2025 - MAY 2025

ESIC Business & Marketing School – *Postgraduate of Data Analytics and Business Intelligence*

NOVEMBER 2022 - NOVEMBER 2023

Federal Fluminense University – *Bachelor of Mechanical Engineering*

AUGUST 2010 - APRIL 2017

- Participated in the "Socioeconomic Study of Engineering Students" project, focusing on data collection, processing, and analysis to understand the socioeconomic aspects of students.

Institute of Technical Culture – *Technical of Business Administration*

FEBRUARY 2007 - DECEMBER 2007

- Final group project – Recognized as the best project of the year (2007)

Languages

- English (Intermediate)
- German (Beginner)

Trainings and Certifications

- MLOps End-to-End Machine Learning Projects – DataTalksClub (in progress)
- Machine Learning Zoomcamp – DataTalksClub
- Master Power BI – Udemy
- SQL for Databases – Udemy

- Advanced Excel with VBA – UnB (EAD)
- Bootcamp: Python Data Analyst – DIO / Squadio (6th out of 23k+ participants)
- Bootcamp: Data Science with Python – DIO / iFood (17th out of 17k+ participants)
- Bootcamp: Generative AI with AWS – Trybe
